Capstone Project. – Data source

By Ashish

We would be using following data source for current project.

1. Wikipedia

   We will use Neighborhood data from wikipedia link. Following link can provide number of Indian live in parts of London.
   https://en.wikipedia.org/wiki/Ethnic_groups_in_London

2. Foursquare.com

   Once we have list of neighbourhood in London from Wikipedia, we will use foursquare api (https://api.foursquare.com) to fetch the details of each neighborhood to find out number of India restaurants in them. We will fetch the latitude and longitude and venues information.
